Upgrade to Platinum Edition to Add Live Auto Insurance Quoting for Consumers to Your Website with

QQWEBAGENT™

QQ WebRater is the state-of-the art Web-based auto insurance comparative rater that runs from your PC or Mac[1] Web browser wherever you have a broadband Internet connection.

QQ WebRater quotes up to 6 cars and 6 drivers, provides real-time rates, pulls MVRs, bridges to carriers, runs Undisclosed Driver Reports, and seamlessly integrates with QQ Evolution™ or QuickFile™ agency management systems.

QQ WebRater Platinum Edition includes **QQ WebAgent™**, a consumer portal that adds real-time auto insurance quoting to your agency's website[2], along with lead distribution and management with the integrated **QQ Marketing Dashboard™**.

Unlike most insurance quote forms that look the same on every agency's website and are not user-friendly, QQ WebAgent provides a compelling, easy-to-use interface in the consumer's choice of English or Spanish. It's also completely customizable, allowing you to control how the QQ WebAgent user interface appears on your website, including branding related parameters, such as selectable "skins" and configurable input questions, default values, quote results display and much more.

See how much you'll save with QQ WebRater. Try our interactive return-on-investment calculator at: **www.QQWebRater.com/roi**. To learn more, visit **www.QQWebRater.com** or call **1.800.940.6600** today!

* **"But I don't have a website."**
No problem! Go to **www.QQWebSites.com** and easily register a domain, build your site and be up on the Web in as little as 24 hours!

Choose your QQ WebRater™ Edition and upgrade at any time!
